Kathmandu-Nepal

CAREER SUMMARY

Skilled in Python, Django, and Prefect, with a strong foundation in problem-solving, and backend development. Passionate about writing clean, efficient code and optimizing performance. Familiar with databases, APIs, and modern web technologies. Quick learner with a keen interest in exploring new technologies and improving development workflows.

PROJECTS

- **Blog Application (Django)**

<https://github.com/mrsushilshrestha/Blog-Django>

Developed a blog platform using Django, enabling users to create posts, like, and comment. Implemented user authentication to ensure only logged-in users can interact with posts. Features include user registration, login/logout functionality, and secure management of user data.

- **E-commerce Admin Pannel (Django)**

<https://github.com/mrsushilshrestha/product-admin-master>

Developed a fully functional E-Commerce Admin Panel using Django with PostgreSQL (PgAdmin) as the database and Django REST Framework (DRF) for API integration. The system enables efficient product management, order tracking, user authentication, and real-time inventory control.

- **Gesture Control System (Python, OpenCV)**

<https://github.com/mrsushilshrestha/Gesture-Control-Project>

Developed an AI-powered Gesture Control System using OpenCV in Python, enabling real-time interaction through hand and facial gestures. The system includes features like Air Writing, Face Detection, and Smile Detection, making it suitable for interactive applications and smart control systems.

- **Hospital Management System(PHP)**

<https://github.com/mrsushilshrestha/Hospital-Management-System-PHP>

Developed a complete Hospital Management System using PHP with Bootstrap as the frontend framework. The project features a well-structured user interface built with HTML, CSS, and JavaScript, ensuring a responsive and user-friendly experience. The backend, developed in PHP, manages data processing and system logic efficiently.

EDUCATION

Himalayan WhiteHouse International College, Purbanchal University

Bachelor of Information Technology

Kathmandu-Nepal

April 2021-Present

Columbus HSS College

High School (Computer Science)-(3.41)

July 2019-July 2021

SKILL SUMMARY

- Specialization: Python and Django
- Languages: C, C++, Java, PHP, SQL, JavaScript, HTML, CSS
- Frameworks & Tools: Django, Git, Bootstrap
- Databases: MySQL, postgreSQL
- Platform: Linux, Web, Windows, Android
- Interpersonal Skills: Leadership,Teamwork,Communication

WORK EXPERIENCE/ VOLUNTEERING

Graphics Designer (Canva, Figma)

February 2024

Hult Prize Organization

TRAINING/CERTIFICATE

Python (Django)
